Instructions for manual security override on PC

Let’s assume you have downloaded OCHRE, want to open it and you click OK:

then you click Run here:
and this happens:

![Java Application Blocked](image)

then you will have to perform a manual override of the Security Settings in your Java Panel:
1 Search for Java and click ‘Configure Java’:
2 In the Java Control Panel, click the Security tab:
3 In the Security tab of the Java Control Panel, click Edit Site List:
4 In Exception Site List screen, click Add:

5 This will lead to this screen:
6 Insert url: [https://ochre.lib.uchicago.edu](https://ochre.lib.uchicago.edu), then click OK (do not click Add):
7 In the Java Control Panel, you will see this; click OK
You might see a warning. Click Run. If the same screen shows up again, tick the box ‘I accept the risk …’, click Run. Repeat until it finally accepts that you really wish to run OCHRE.

Now you are in OCHRE:
